

SMART ARTZ SAFETY SIGNS

Users Step-By-Step Guide

Question: How do I open the Smart Artz Safety Signs in each of the file formats?

Answer:

SIGNLAB USERS

In Signlab, simply choose the file number displayed underneath the safety sign you require from the Smart Artz Safety Sign Manual. Then choose the size of the background - either (A) 200mmx150mm (B) 300mmx200mm (C) 400mmx300mm (D) 600mmx450mm, and then add that letter to the end of the number required. Then follow these steps: -

1. Choose "File" on the task bar, and then choose "Open"
2. Direct your computer to the CD-Rom drive (usually "D" drive)
3. Choose the heading folder you require (e.g. Danger)
4. Choose the Signlab "cdl" folder
5. Select the number you require and associated letter (A, B, C, D) after that number which allocated the size of the file you require.
6. Then choose "Open"

To use the common titles included in the manual, simply choose the blank sign required as displayed at the top of the page and ending in "oo", then follow these steps: -

1. Choose "File" on the task bar, and then choose "Open"
2. Direct your computer to the CD-Rom drive (usually "D" drive)
3. Choose the heading folder you require (e.g. Danger)
4. Choose the Signlab "cdl" folder
5. Select the sign blank number your require and associated letter (A, B, C, D) after that number which allocated the size of the file you require.
6. Then choose "Open"
7. Then choose "File" on the task bar, and then choose "Open"
8. Then follow steps (2) to (4)
9. Select the other common title and relevant number (A, B, C, D)
10. The tick the merge option, then choose "Open"

Note: if there is not a common title you require you can simply edit the text and change it to the lettering you require.

COREL 8 USERS

In Corel 8, simply choose the file number displayed underneath the safety sign you require from the Smart Artz Safety Sign Manual. Then choose the size of the background - either (A) 200mmx150mm (B) 300mmx200mm (C) 400mmx300mm (D) 600mmx450mm, and add that letter to the end of the number required. Then follow these steps: -

1. Set the page size of the safety sign you require either (A, B, C, D)
2. Choose "File" then "Open" from the taskbar in Corel
3. Direct your computer to the CD-Rom drive (usually "D" drive)
4. Choose the heading folder you require (e.g. Danger)
5. Choose the Corel 8 "cdr" folder
6. Choose the file number and associated letter you require after that number which allocates the file size you require.
7. Then choose "Open"

To use the common titles included in the manual, simply choose the blank sign required as displayed at the top of the page and ending in "oo", then follow these steps: -

1. Choose "File" on the task bar, and then choose "Open"
2. Direct your computer to the CD-Rom drive (usually "D" drive)
3. Choose the heading folder you require (e.g. Danger)
4. Choose the Corel "cdr" folder
5. Select the sign blank number your require and associated letter (A, B, C, D) after that number which allocated the size of the file you require.
6. Choose "Open"
7. Then when the blank sign appears on the screen, chose "File" then "Import" on the taskbar.
8. Follow steps (3) to (5)
9. Choose the number of the common title you require
10. Then choose "import"
11. Then when the marquee appears on screen press the "Enter" key, which drops the common title text in the centre of the sign blank.

CASMATE, COREL AND OTHER SIGN PROGRAMS

In your program, simply choose the file number displayed underneath the safety sign you require from the Smart Safety Sign manual. Then choose the size of the background - either (A) 200mmx150mm (B) 300mmx200mm (C) 400mmx300mm (D) 600mmx450mm. Then add that letter to the end of the number required. Then follow these steps in your signmaking program:-

1. Choose "Import"
2. Direct your computer to the CD-Rom drive (usually "D" drive)
3. Choose the type of file you wish to import (either EPS, Ai, WMF)
4. Then choose the heading folder you require (e.g. Danger)
5. Then choose the appropriate file folder "Ai", "EPS" or "WMF"
6. Choose the file number required and associated letter (A, B, C, D) after that number which allocates the size of the file required.

If you want to import one of the common titles included in the manual, chose the sign blank at the top of the page ending with "oo". Then follow steps (1) to (6) to import the common title number over the top of the sign blank.

Note: All these layouts have been saved exactly to the centre of the page so when you import the common titles over top of the sign blanks they should land in the centre.
